▶ TITLE:	Fibrrwrap Carbon Reinforced Polymer (CFRP) Internal Rehabilitation of 48-inch & 60-inch Prestressed Concrete Cylinder Pipe (PCCP)
▶ DESCRIPTION:	Supply and install Fyfe Company LLC Tyfo SCH Fibrrwrap system to strengthen fifteen (15) lengths of "Priority 1" 48-inch PCCP and two (2) lengths each of "Priority 2" 48-inch and 60-inch PCCP Water Main located in the area surrounding the recent 48-inch water main rupture located at SW 56 th Street and SW 124 th Avenue. Priority One category which means the PCCP Pipes are either at high risk or very high risk of imminent and catastrophic rupture and failure. Priority 2 indicates significant prestressing wire degradation and likely failure within a relatively short period of time.
▶ PURPOSE:	<p>To internally reinforce and restore the pressure integrity condition of the PCCP water main in the surrounding area of the recent major rupture point located SW 56th Street and SW. 124th Avenue. The total of 19 lengths were identified from a pipeline condition assessment report utilizing a non-destructive patented technology called Pipe Diver, a free swimming live PCCP inspection tool. This free swimming tool can be inserted into a closed pipeline system and operated for up to 36 hours before requiring retrieval and recharging.</p> <p>The advantage that this technology has over conventional technologies that provide recorded video inspection results is that the Pipe Diver transmits a signal that when combined with the patented software is able to detect and locate the number of damaged or broken prestressing wires located inside the PCCP. All of the results and information are presented in a full assessment report that provides summary of damaged segments of the pipe and also ranks them in priority category and quantitative order of number of broken prestressing wires.</p>

<p>► Documentation</p> <p>Comments:</p>	<p>The Miami-Dade Water and Sewer Department (WASD) field crews responded to an emergency call on May 3, 2011 at 2:15 p.m. regarding a 48-inch water main that supplies water to the southern-end of Miami-Dade County on Miller Road, specifically on Southwest 56 Street and Southwest 124 Avenue. The water main break generated a surging torrent of water that eroded the median and the eastbound and westbound lanes located at SW 124 Avenue flooding businesses and homes in the areas adjacent to the rupture. The erosion created a sinkhole in the westbound lane into which a school bus fell into and rendered the affected intersection unsuitable for mobile or foot traffic.</p> <p>The impacted area was immediately sealed off and WASD's repair crews successfully closed the valves to shut off the water flow from the portion of the 48-inch water main that had ruptured. Due to the magnitude of the rupture, WASD immediately contacted Lanzo Construction, Inc. (Lanzo) and authorized their mobilization to repair the 48-inch water main, and ordered all available in-house forces to the repair site. Upon arrival, WASD repair crews began pumping out water from flooded areas restoring water service to ten affected homes and businesses.</p> <p>Prior to this main break, WASD had contacted Pure Technologies, Ltd. to inspect the PCCP water mains in the surrounding area and provide a full condition assessment report. WASD used the draft report summarizing PCCP condition to determine the necessary and immediate emergency action to mitigate the very high risk of impending catastrophic ruptures. WASD had previously analyzed marketplace technology trends and identified two known methods to deal with this type of situation, the Fibrwrap CFRP process and CIPP liner by Insituform, and chose Fibrwrap process. The deciding factors were that the Fibrwrap estimated costs were significantly lower, and because it was non-invasive, would generate significantly less disruption of traffic and eliminate the requirement of road restoration and repair.</p> <p>Fibrwrap Construction is recognized worldwide for developing innovative techniques to strengthen and repair large diameter pipelines and the Fyfe Company Tyfo System coatings are NSF approved for use in structures containing potable water. Fibrwrap was originally developed for seismic strengthening of bridge columns. Following the successful research and testing for use in both circular and rectangular columns, Fibrwrap has also been successfully tested and used on nearly all concrete structural elements.</p>
Background/Need to Know:	Draft report revealed significant areas of prestressing degradation that required immediate action to avert other potential ruptures and threats to the service pressure integrity of the Countywide water distribution service infrastructure.
Potential Issues:	Failure to take immediate action to the affected 60-inch and 48-inch water distribution pipeline would almost assure another catastrophic rupture and potential failure of the entire water distribution system.

various portions of the Work. The schedule of values shall be prepared in such form and supported by such data to substantiate its accuracy as the Architect may require. This schedule, unless objected to by the Architect, shall be used as a basis for reviewing the Contractor's Applications for Payment.

§ 5.1.5 Applications for Payment shall show the percentage of completion of each portion of the Work as of the end of the period covered by the Application for Payment.

§ 5.1.6 Subject to other provisions of the Contract Documents, the amount of each progress payment shall be computed as follows:

- .1 Take that portion of the Contract Sum properly allocable to completed Work as determined by multiplying the percentage completion of each portion of the Work by the share of the Contract Sum allocated to that portion of the Work in the schedule of values, less retainage of percent (%). Pending final determination of cost to the Owner of changes in the Work, amounts not in dispute shall be included as provided in Section 7.3.9 of AIA Document A201™-2007, General Conditions of the Contract for Construction;
- .2 Add that portion of the Contract Sum properly allocable to materials and equipment delivered and suitably stored at the site for subsequent incorporation in the completed construction (or, if approved in advance by the Owner, suitably stored off the site at a location agreed upon in writing), less retainage of percent (%);
- .3 Subtract the aggregate of previous payments made by the Owner; and
- .4 Subtract amounts, if any, for which the Architect has withheld or nullified a Certificate for Payment as provided in Section 9.5 of AIA Document A201-2007.

§ 5.1.7 The progress payment amount determined in accordance with Section 5.1.6 shall be further modified under the following circumstances:

- .1 Add, upon Substantial Completion of the Work, a sum sufficient to increase the total payments to the full amount of the Contract Sum, less such amounts as the Architect shall determine for incomplete Work, retainage applicable to such work and unsettled claims; and
(Section 9.8.5 of AIA Document A201-2007 requires release of applicable retainage upon Substantial Completion of Work with consent of surety, if any.)
- .2 Add, if final completion of the Work is thereafter materially delayed through no fault of the Contractor, any additional amounts payable in accordance with Section 9.10.3 of AIA Document A201-2007.

§ 5.1.8 Reduction or limitation of retainage, if any, shall be as follows:

(If it is intended, prior to Substantial Completion of the entire Work, to reduce or limit the retainage resulting from the percentages inserted in Sections 5.1.6.1 and 5.1.6.2 above, and this is not explained elsewhere in the Contract Documents, insert here provisions for such reduction or limitation.)

§ 5.1.9 Except with the Owner's prior approval, the Contractor shall not make advance payments to suppliers for materials or equipment which have not been delivered and stored at the site.

§ 5.2 FINAL PAYMENT

§ 5.2.1 Final payment, constituting the entire unpaid balance of the Contract Sum, shall be made by the Owner to the Contractor when

- .1 the Contractor has fully performed the Contract except for the Contractor's responsibility to correct Work as provided in Section 12.2.2 of AIA Document A201-2007, and to satisfy other requirements, if any, which extend beyond final payment; and
- .2 a final Certificate for Payment has been issued by the Architect.

§ 5.2.2 The Owner's final payment to the Contractor shall be made no later than 30 days after the issuance of the Architect's final Certificate for Payment, or as follows:

Payment will be made in compliance with Miami-Dade County code.
